 Doha, Qatar

Executive Summary

AI Product Lead with 7+ years building digital products where emerging technology, customer experience and commercial strategy meet. I turn ambiguous opportunities into clear product bets, align executives and cross-functional teams, and take complex initiatives from vision to scaled delivery.

I lead with a systems view - connecting trusted knowledge, intelligent discovery, conversational and agentic experiences, experimentation and responsible AI. At Qatar Airways, I lead an 18-person cross-functional team and translate emerging technology into measurable customer and business value.

Employment History

Qatar Airways | Jun 2025 - Present

PRODUCT LEAD (PRODUCT OWNER MANAGER)

Own the vision, roadmap and delivery of Qatar Airways' next generation of AI-powered travel experiences, aligning design, engineering, data, commercial and executive stakeholders.

Selected impact:

- Lead an 18-person cross-functional team owning qatarairways.com, a global digital platform serving millions of visitors.
- Lead an AI-ready knowledge graph that connects trusted product data across intelligent travel journeys.
- Contributed to Sama agentic booking and Q Search, helping turn natural-language intent into useful travel answers and itineraries.
- Own Qatar Airways product showcases for Web Summit Qatar 2024, 2025 and 2026, shipping a flagship experience for each edition.
- Lead FIFA World Cup gamification and Offers 2.0 across loyalty, engagement and personalized discovery.
- Own a program of 150+ homepage A/B tests improving conversion, enrollment, customer satisfaction and realized value.

Certain commercial metrics and implementation details are omitted in accordance with contractual confidentiality obligations.

Qatar Airways | Feb 2023 - Jun 2025

SENIOR UX DESIGNER

- Created and led Dream Destination, an AI-powered experience that helps travelers find their dream destination in about one minute.
- Presented promptless, emotion-aware AI travel discovery at Web Summit Qatar 2025.
- Led the next-generation homepage and a travel guide spanning 2M+ origin-destination combinations, increasing SEO traffic by 13%+.
- Directed research and experimentation that reduced user errors and improved high-value customer journeys.

Yassir | Apr 2022 - Apr 2023

SENIOR PRODUCT DESIGNER

- Led Yassir Business within a 20M+ download product ecosystem, designing how companies manage employee transport, budgets and business trips.
- Led the driver-facing experience for an app with 1M+ downloads, improving onboarding and everyday work on the road.
- Built SEFAR, a design system supporting 7+ businesses with reusable foundations, components and scalable governance.
- Won an internal product hackathon by moving from problem to validated prototype in one sprint.

- Research strategy, usability testing and insight synthesis
- Web, mobile and omnichannel experience leadership

Employment History continued

ZER | Jan 2020 - Jan 2022

LEAD PRODUCT DESIGNER

Owned a multi-service mobile product from discovery through launch across Android and iOS, translating customer evidence and business goals into a clear product roadmap.

Selected impact:

- Established the product design practice and aligned stakeholders around product metrics and priorities.
- Led retention, usability and roadmap improvements that increased customer satisfaction and engagement.
- Reduced delivery waste by validating journeys and requirements before development.

Developatic | Oct 2020 - Apr 2022

PRODUCT DESIGNER

Owned product design across multiple startup engagements at a mobile-first digital agency, moving from research and strategy to production-ready mobile and web experiences.

Selected impact:

- Partnered with research teams and 25+ domain experts to turn specialist knowledge into usable products.
- Led market research, product definition, interaction design and developer handoff across varied sectors.
- Improved a job-seeker platform through iterative UX refinement and cross-functional delivery.

Independent | Sep 2018 - Oct 2021

FRONT-END DEVELOPER & DESIGNER

Built responsive web and mobile experiences for startups, bridging product design, usability and front-end implementation.
